Open Access & Open Science @ UniCa:
present status and perspectives

Abstract

The paradigms of "Open Science" and "Open Access" are key concepts in the agenda of the European Research Area and, therefore, they represent a commitment (and, in many ways, a challenge) both for individual researchers and for the institutions that are called to implement them. In this seminar (i) we will discuss how the University of Cagliari is moving in the broad area of "Open Science/Access" and (ii) we will deal with its underlying concepts and ongoing practices through the presentation of actual show-cases. Furthermore, the current placement of our University in this framework will be as well presented in relation to its commitments within the European Digital UniverCity (EDUC) Alliance and in the perspective of the Human Resources Strategy for Research (HRS4R) we are about to open.

Programme

Introduction

Open Science & Open Access: the general picture
Luciano Colombo, *Vice-Rector for Research, UniCa*

Session 1: Open Access

Community controlled infrastructures for Open Access @UniCa
Giovanna Frigimelica, *Quality, Library Services and Museums Division, UniCa*

I will present the rich portfolio of available Open Access options for our scholarly community: from our diamond open access publisher to our Institutional repository for the green road, through transformative agreements and other incentives for open access publication with scientific publishers.

UniCa Open Access policy through the "Green road"
Cristina Aresu, *Research and Territory Division, UniCa*

I will discuss the UniCa 2022-renewed Open Access Policy, focusing on the IRIS institutional research repository of UniCa and showing some statistics from the platform.

UNICA
UNIVERSITÀ DEGLI STUDI DI CAGLIARI

OCTOBER 27th 2023

11:00 am - 13:00 pm (CEST)

On-line event

International Open Access Week

Open Access & Open Science @ UniCa:
present status and perspectives

Session 2: Open Science

UniCa Open Science experience within the EDUC-Share project
Elisabetta Cagetti, *Research and Territory Division, UniCa*

I will present the actions for the UNICA institutional OS strategy emerged from the HRS4R strategy and the experience in the H2020 project EDUC-SHARE:
Contribution by Silvio Ferrero, *associate professor Dept. of Chemical and Geological Science UniCa*
Participation to the call for research Infrastructure access within the EDUC Alliance.

Focus on open research infrastructures: the CeSAR show-case @ UniCA
Sabrina Giglio, *Director CeSAR, UniCa*

I will present the organization of CeSAR, a high-performance, high-quality and open research infrastructure. I will describe the ongoing programs and infrastructure projects addressed to meet the global requirements for a modern, well-used and internationally rooted research infrastructure according to the principle of open access for all researchers, both inside and outside the University environment.

Session 3: Discussion
(moderated by Luciano Colombo)

OCTOBER 27th 2023

11:00 am - 13:00 pm (CEST)
